

Medical Works.

By Professor MACEWEN, M.D., F.R.S., Glasgow.

Pyogenic Infective Diseases of the Brain and Spinal Cord. By WILLIAM MACEWEN, M.D., LL.D., Regius Professor of Surgery in the University of Glasgow. Illustrated. Demy 8vo. 18s. net.

Atlas of Head Sections. 53 Engraved Copper Plates of Frozen Sections of the Head, with 53 Key Plates with Detailed Descriptions and Illustrative Text. By Professor MACEWEN, M.D. Demy 4to. 70s. net.

"These volumes deal with a department of surgical practice that has undergone a remarkable development within quite recent times, and the author is distinguished by the extent and brilliant success of his experience in it. Naturally anything he publishes on this subject commands attention, and, after having read the book (on the Brain and Spinal Cord) most attentively, we assure our readers that it more than fulfils expectations, and is in every part worthy of the great reputation of its author. The Atlas is also unique in its excellence. The surgeon needs to know the relation to the cranial surface of every structure within the skull. With the help of these plates such knowledge is put within his reach at once. Dr. Macewen has placed all surgeons under a great debt of obligation in preparing these sections. . . . These volumes are of extreme value and importance, and will be gladly welcomed by all surgeons who are interested in this department of surgery. Both as a record of successful work and as written and pictorial instruction to other workers they have rarely been surpassed."—*Lancet*.

"Those who read this book (on the Brain and Spinal Cord) will see how marvelously successful results have been obtained by accurate diagnosis and localization, and by thorough antiseptic methods in operating on such cases. . . . It is hardly possible to imagine a more admirable text-book, from cover to cover, or a more difficult and important field of surgery. We congratulate Professor Macewen on his work, and his pupils and his University on the teacher they have been so fortunate to secure.

"The Atlas of Head Sections, in various directions, is a valuable and important addition to the series of plates from frozen subjects. By this means the real relation of the different parts of the brain to the surface and to each other are given."—*Edinburgh Medical Journal*.

"The work before us (on the Brain and Spinal Cord) with the magnificent Atlas which accompanies it, is a record of work of which the author and British Surgery may well feel proud. . . . The text is profusely illustrated with original drawings, wood engravings, photogravures, and there is a copious and well arranged Index and table of Contents. Detailed records of sixty-five cases are given, many of them veritable marvels of surgical achievement. Altogether the work is one which cannot fail to mark an epoch in brain surgery."—*Dublin Journal of Medical Science*.

"The most striking character of the whole of the work is its extreme precision, replacing the somewhat haphazard manner in which surgery has generally been applied to the complications of middle-ear disease. Dr. Macewen has, in fact, succeeded in making it impossible for a surgeon to deal satisfactorily with such cases without having first carefully studied this book."—*Medical Chronicle*.

By Professor JOHN G. M'KENDRICK, M.D., Glasgow.

Text-Book of Physiology. By JOHN GRAY M'KENDRICK, M.D., LL.D., F.R.S., Professor of the Institutes of Medicine in the University of Glasgow, Fellow of the Royal College of Physicians of Edinburgh; including HISTOLOGY, by PHILIP STOHR, M.D., of the University of Würzburg. 2 vols. Demy 8vo. 40s.

Vol. I.—General Physiology, including the Chemistry and Histology of the Tissues and the Physiology of Muscle. 542 Pages, 400 Illustrations. 16s.

Vol. II.—Special Physiology, including Nutrition, Innervation, and Reproduction. 830 Pages, 500 Illustrations. 24s.

"The clearness of the style, and the abundance and excellence of the drawings, cannot fail to render the work, as it deserves to be, one of the most popular text-books of Physiology in our language."—*Dublin Journal of Medical Science*.

"The work will rank high in its own department, and, like all Professor M'Kendrick's works, it is definite, clear, and precise, and ought to be acceptable to the physiologist and the student."—*Scotsman*.

By Professor W. T. GAIRDNER, M.D., Glasgow.

The Physician as Naturalist, Memoirs bearing on the Progress of Medicine. By W. T. GAIRDNER, M.D., LL.D., F.R.S., Professor of Medicine in the University of Glasgow. Crown 8vo. 7s. 6d.

By J. WALLACE ANDERSON, M.D.

Lectures on Medical Nursing. By J. WALLACE ANDERSON, M.D. Fourth Edition. Fcap. 8vo. 2s. 6d.

"An admirable guide. In many respects the best manual we at present possess on the subject."—*Lancet*.

"The very important subjects these lectures discuss are severally treated with clearness, precision, and sound judgment."—*Spectator*.

"Dr. Anderson's admirable little book contains just such information as every nurse should possess, and this is seasoned with much wise advice and many good maxims."—*Birmingham Medical Review*.

"A valuable text-book. Throughout his instructions Dr. Anderson is always practical and clear."—*Health*.

The Essentials of Physical Diagnosis: A Guide-Book for Students. By J. WALLACE ANDERSON, M.D. Fcap. 8vo. 3s.

"The work is accurate and well arranged, and ought to be popular with students."—*British Medical Journal*.

By THOMAS BARR, M.D., Glasgow.

Manual of Diseases of the Ear, for the Use of Practitioners and Students of Medicine. By THOMAS BARR, M.D., Lecturer on Aural Surgery in the University of Glasgow. New Edition. Medium 8vo. Re-written and greatly enlarged.

[In the press.]

"The best manual on the subject that has been produced for many years."—*Medical Chronicle*.

"The book deserves to have a large circulation."—*Archives of Otolaryngology*.

"For its size, we know of no work to surpass it in the information it contains, its clearness of style and the comprehensive grasp taken of the subject."—*Dublin Journal of Medical Science*.

By J. WALKER DOWNIE, M.B., Glasgow.

Clinical Manual for the Study of Diseases of the Throat. By J. WALKER DOWNIE, M.B., Lecturer in the University of Glasgow on Diseases of the Throat and Nose. Crown 8vo. Illustrated. 6s. net.

"A compact and carefully compiled volume, which we welcome as supplying a distinct need."—*Glasgow Medical Journal*.

By JOHN GLAISTER, M.D., Glasgow.

Dr. William Smellie and his Contemporaries.

A Contribution to the History of Midwifery in the Eighteenth Century. By JOHN GLAISTER, M.D., Professor of Forensic Medicine and Public Health, St. Mungo's College, Glasgow. With Portrait and Illustrations. Demy 8vo. 10s. 6d net.

"One of the most interesting and well-executed medical biographies which it has been our lot to read."—*British Medical Journal*.

By Professor T. M'CALL ANDERSON, M.D.

On Affections of the Nervous System, their Diagnosis and Treatment. By T. M'CALL ANDERSON, M.D., Professor of Clinical Medicine in the University of Glasgow. Demy 8vo. 5s.

By Professor WILLIAM LEISHMAN, M.D.

A System of Midwifery. By the late WILLIAM LEISHMAN, M.D. Fourth Edition. 2 vols. Demy 8vo. 24s.

By **GEORGE R. MATHER, M.D.**

Two Great Scotsmen. The Brothers William and John Hunter. By **GEORGE R. MATHER, M.D.** With Five Etchings by **D. Y. CAMERON**, Four Portraits, and numerous Illustrations. Fcap. 4to. 10s. 6d. net.

“‘Two Great Scotsmen’ is in every respect worthy of its theme and purpose. Dr. Mather’s biography, while minute and faithful in regard to the Hunters’ antecedents, deals fully with their professional careers. To the other merits of the volume must be added those of beautiful type and artistic plates.”—*Times*.

By **J. LINDSAY STEVEN, M.D.**

Outlines of Practical Pathology. An Introduction to the Practical Study of Morbid Anatomy and Histology. By **J. LINDSAY STEVEN, M.D.** Crown 8vo. 7s. 6d.

“To the earnest student bent on seeing for himself the facts of which he reads, such a manual as that of Dr. Steven’s will be invaluable.”—*Lancet*.

“This is a sensible, practical, useful book.”—*Bristol Medico-Chirurgical Journal*.

By Professors **JOHN CLELAND, M.D., F.R.S.,** and **JOHN YULE MACKAY, M.D.**

A Text-Book of Anatomy. By **JOHN CLELAND, M.D., D.Sc., F.R.S.,** Professor of Anatomy in the University of Glasgow and **JOHN YULE MACKAY, M.D.,** Professor of Anatomy in University College, Dundee, University of St. Andrews. Profusely illustrated. Medium 8vo. *[In the press.]*

By **JAMES KERR LOVE, M.D.,** and **W. H. ADDISON.**

Deaf Mutism. A Treatise on Diseases of the Ear as shown in Deaf Mutes, with Chapters on the Education and Training of Deaf Mutes. By **JAMES KERR LOVE, M.D.,** Hon. Aurist to the Glasgow Institute of the Deaf and Dumb, and **W. H. ADDISON,** Head-Master of the Institute. Demy 8vo. Illustrated. *[In the press.]*
